Summary

I would like to say I'm till date very fascinated by the possibilities, I
have and could unlock learning about further IT skills. I always found
it lovely to be able to apply my mathematics interest as well into
programming and other computer concepts. I'm currently expanding
my knowledge, as I believe everyone should always be doing, of
programming and related fields. My knowledge of mathematics and
computer has also helped me in preparing for both my Alevel exams
as well as future practical life.
